

Introduction

Serial Port Server w/ Wi-Fi® (C30 - C32)

Serial Port Server is a complete hardware and software solution for creating remote communication ports. The software part can be uploaded to any of the Redisage C30 - C32 Ethernet Converters. It provides a communication between a LAN host and a device equipped with RS232/RS485 serial interfaces. A dedicated app makes it easy and fast to configure and deploy. There is a possibility to create virtual COM ports with the Redisage Configurator to minimize number of cables. Onboard Wi-Fi module makes it even more versatile and independent solution.

C30 Wi-Fi Ethernet
2xRS232 Converter

Power: --- 12-30V/DC < 1W
Temperature: -40°C + 75°C
Port: 2xRS232 ETH
Wi-Fi: 802.11b/g/n
Ethernet: 10/100BaseT
MAC Add: #####MAC1#####
REV1 MADE IN EU
