

Hello World

STM32 Open IoT and IIoT Gateways (P10 - P12)

Link to repositories:

- [C](#)

This example uses UART4 in the MCU which is reserved for the USB UART communication. A simple string is printed on the console and then the device restarts after 10 seconds of countdown. Use 115200 baudrate.

```
Hello world!  
The device will restart in:  
10  
9  
8  
7  
6  
5  
4  
3  
2  
1  
Restarting device...  
█
```
