

User Management

Tiger City IMX Industrial Computer with Linux OS

Default user

The default user in Tiger is the only one available after the first boot.

- login: **root**
- no password

Create new users

In order to list all existing users in the system use the following command:

```
awk -F':' '{print $1}' /etc/passwd
```

To add a new user and create a home directory for it use the following command:

```
sudo useradd -m user_name
```

To verify that the user was created and view the user's details use:

```
sudo id user_name
```

To set a new password for the user use the following command:

```
sudo passwd user_name
```

After that, logging in as a new user will be possible. The current user can be checked with the "whoami" command.

Delete users

A user and its home directory can be deleted with the following command:

```
sudo userdel -r user_name
```
